RPF issued Dec. 5, 2018

REQUEST FOR PROPOSAL

The City of Rochester is seeking proposals from qualified Consultants (“Consultant(s)”) to conduct a feasibility study and provide recommendations for implementation of collecting and composting source separated organics (SSO) as part of the City’s residential and commercial solid waste management program, (the “Project”). The consultant will assess the type and quantity of materials that can be composted, evaluate best options for collection containers, collection equipment, processing systems/equipment and procedures, and customer education to assist the City in developing a safe, cost-effective, environmentally and customer friendly and efficient composting program.

BACKGROUND

The City of Rochester provides Solid Waste Management services including refuse and recycling collection for residential and commercial customers. Aside from refuse collection, the City has been providing a recycling program since the late 1980s and in 2016, converted to Mixed Recycling, offering larger wheeled collection containers, with every other week service that is a more efficient operation, more convenient for customers and better for our environment. During the fall season, the City collects leaves for composting at a facility operated by Monroe County and located on Avion Drive near the Monroe County EcoPark. In the spring and summer, the City provides this compost at no cost to residents to use for landscaping. While the City’s Mixed Recycling program and leaf composting program help to divert waste away from the landfill, the City is interested in understanding the feasibility of implementing an organics collection (for example, food waste) and composting program to further reduce the amount of waste sent to landfills and reduce GHG emissions.

The City has been taking action to reduce greenhouse gas emissions and energy use in its operations for several years, and formalized these actions in 2012 in its Municipal Operations Climate Action Plan. To begin to address community wide energy usage, the City participated with the New York Power Authority (NYPA) in the development of a City of Rochester Energy Master Plan, which was released in early 2015. The City developed the Rochester community-wide Climate Action Plan (CAP), which was endorsed by City Council in May 2017. The CAP’s goal is to reduce GHG emissions by 20% from 2010 levels by 2020 and by 40% from 2010 levels by 2030. Through actions related to energy efficiency, transportation, waste management, water and land use, the CAP lays a foundation to reduce the impacts of climate change and adapt to its unavoidable impacts. The CAP’s waste management strategy recommends the implementation of an organic materials collection program including food and yard waste as an action that will help to reduce the amount of waste sent to landfills and as a result, reduce landfill GHG emissions such as methane. Additionally, compost produced from the organics program is a useful end-product that can improve the quality of soil on city and residential properties and promote the expansion of flower and vegetable gardens that will benefit the community as well as wildlife.

SCOPE OF SERVICES

The City is seeking the services of a Consultant to perform the following services as part of a feasibility study on the development of a composting program that includes collecting and composting source separated organics (SSO) as part of the City's residential and commercial solid waste management program. The Respondent's proposal shall address each of the requested services, using the same identifying language, including any or section numbers as used in the RFP.

1. Evaluate types of compostable material the City could accept/collect (i.e. food scraps, yard waste, compostable food containers, meat, bones). If a waste characterization study is recommended, describe study method and include the cost of such a study as a separate item.
2. Evaluate types of collection containers appropriate for different customers. Composting program participants may include but are not limited to single- and multi-family residential customers, food service industry commercial customers, and small and large business commercial or institutional customers. Containers should be evaluated in terms of how they fit in the current collection system (operator and vehicle). Containers must be practical for customer use, safe and cost effective, designed to protect public health and reduce nuisance factors such as odor, pests or leaking.
3. Evaluate collection vehicles currently used by the City to collect solid waste and determine if they can be used for SSO collection. Consideration should be given to compacting and non-compacting vehicles, as well as front, over-the-top, side, and rear loading trucks requiring manual collection or collection with semi-automated or fully automated tippers. Consider whether a vehicle like a hybrid (split body) truck can be used to collect SSO alongside refuse or recyclables.
4. Evaluate collection methods and frequency of collection (curbside collection, drop-off, or a combination) in terms of ease of use and safety for participants and operators, and cost effectiveness. Consider staffing requirements, and maintenance and replacement of containers, vehicles and processing equipment. Solicit public feedback as appropriate
5. Evaluate collection scheduling options. Consider peak yard waste months of October and November, as well as staffing and maintenance and replacement of equipment. Solicit public feedback as appropriate.
6. Evaluate processing equipment/systems to possibly be purchased and operated by the City. Include capital, operating and maintenance costs. Consider initial capacity requirements, and potential expansion. Processing equipment/systems should be evaluated in terms of operator safety, performance and impact to public health and the surrounding environment. Consider how the equipment/system will prevent or manage leachate/runoff, emissions and odors.
7. Determine space requirements for any recommended composting system. Consider vehicle traffic flow and room for expansion of processing capacity.

8. Review and benchmark best practices from other cities involved in SSO collection and processing. Focus on medium-to-large cities in the northeast region with on-street parking and similar weather conditions.
9. Evaluate and recommend the best approach for the City to implement a composting program. Include options for a pilot, phased roll-out, and potential for citywide expansion.
10. Evaluate and recommend all procedures in terms of overall safety and efficiency for customers and operators, and environmental impacts (greenhouse gas emissions reductions).
11. Identify any regional businesses that will accept SSO, and provide cost information for transportation and processing of SSO.
12. Identify potential end uses for resulting compost/digestate/biosolids/biogas/leachate or other by-products, with a focus on potential revenue sources.
13. Identify all local, state and federal regulations related to on-site processing of SSO and the end use, disposal or sale of resulting compost/digestate/biosolids/biogas/leachate or other by-products.
14. Identify metrics to demonstrate the effectiveness composting program, and source(s) of data required. Include greenhouse gas (GHG) emissions calculations of GHG emissions reductions as a result of the composting program (include collection, transportation, processing).
15. Evaluate methods of customer education and communication. Solicit public feedback as appropriate
16. Identify potential grant opportunities to help fund the compost program.

Project Deliverables

1. Meeting summaries and copies of materials distributed
2. Summary of findings from case studies and background research
3. Draft and final feasibility report incorporating feedback from City staff and the public
4. Draft and final recommended plan of approach for implementing collection and processing of SSO incorporating feedback from City Staff
5. Recommended timeline for project implementation
6. Outreach strategy, draft materials and summary of customer feedback (if feedback is solicited)
7. Ten (10) hard copies and an electronic copy of the final feasibility and implementation reports

The City will review all project plans, review and approve draft reports, be included in meetings and coordination with other parties, and will provide information related to City operations, etc.

Pursuant to Ordinance No. 2018-54, the City has a goal that 30% of the aggregate annual contract awards for professional service contracts over \$10,000 be awarded to minorities (M) (15%) and women (W) (15%). The City has also established minority workforce goals of 20% M and 6.9% W for professional services consulting contracts. Respondents shall be awarded MWBE bonus weighting as follows:
 - a. The City will give preference to Consultants who are New York State certified MWBE's with bona fide offices and operations in the Empire State Development Finger Lakes Region, which includes the following counties: Genesee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming and Yates. Consultants who meet this requirements shall receive **an additional weighting of 10%.**

If one or more MWBE subcontractors will perform 10% to 20% of the work of the contract – measured as either a percent of the total contract amount or as a percent of the total full-time-equivalent labor hours budgeted for this project, the consultant shall receive **an additional weighting of 5%.** If MWBE subcontractors will perform more than 20% of the work of the contract, the Consultant shall receive an **additional weighting of 10%.**
 - c. Respondents shall provide sufficient documentation with their proposal to support the additional preference weighting as an MWBE Consultant or for use of MWBE

subcontractors. If one or more MWBE subcontractors are proposed, they must be named and the size of the subcontract identified. If selected, the Respondent shall submit an MWBE Utilization Plan on the City's form for approval by the MWBE Officer. Once approved, the Utilization Plan shall be incorporated into the PSA.

- If the total amount of a PSA is increased by 5% or more at any time during the term of the PSA, the Consultant shall submit a revised MWBE Utilization Plan for approval by the MWBE Officer. The MWBE Officer may also issue a revised MWBE Utilization Plan for unforeseen changes in the availability of MWBE subcontractors during the term of the PSA.
- d. The City will give preference to Consultants who meet or exceed the City's workforce goals, which are: 20% M and 6.9% W. Consultants who demonstrate that their workforce meets or exceeds these goals shall receive an **additional weighting of 10%**. If selected, the Respondent shall submit a Workforce Staffing Plan on the City's Form for approval by the MWBE Officer. Once approved, the Workforce Staffing Plan shall be incorporated into the PSA.
 - e. Respondents must certify in their proposal that, if selected, they will provide MWBE, subcontractor/supplier payment certification and/or workforce utilization reports on the City's forms. These reports shall be submitted with each invoice for service provided or as otherwise requested by the MWBE Officer.
 - f. In addition if the selected Respondent fails to meet the approved MWBE Utilization Plan and/or Workforce Staffing Plan, for which additional weight was awarded by the end of the PSA, such failure may result in disqualification from award of future contracts with the City.
 - g. Summary of additional evaluation weighting points for MWBE and Workforce Goals:

Category of Additional Evaluation Points	Additional Weight Awarded
Respondent is an MWBE	10%
Utilize MWBE Subcontractors for 10-20% of work	5%
Utilize MWBE Subcontractors for more than 20% of work	10%
Meet or exceed workforce goals of 20% M and 6.9% W	10%

City of Rochester Location Preference: The City favors contracting with firms located in the City of Rochester and a preference will be given to Consultants located in the City, through an additional weighting of 10%. Non-local firms may wish to consider partnerships or other collaborative arrangements with local firms as a strategy to address this criterion.

Other Criteria: Other criteria may be considered and evaluated by the City if it is determined to be in the best interest of the City and the success of the Project to do so.

The selection of a Consultant is within the City's sole discretion and no reasons for rejection or acceptance of a proposal are required to be given. Although costs are an important consideration, the decision will be based on qualifications and compliance with the requirements of this RFP and not solely on cost. The City reserves the right to reject any or all proposals or to accept a proposal that does not conform to the terms set forth herein. The City further reserves the right to waive or modify minor irregularities in the proposals and negotiate with Consultants to serve the City's best interest.

The City may request additional information from any Respondent to assist the City in making its evaluation.

The proposal and all materials submitted with the proposal shall become property of the City and will be subject to NYS Freedom of Information Law. If any proprietary information is submitted with the proposal, it must be clearly identified and a request to keep such information confidential must be submitted.
