

Electrical Safety Inspection Application

This application is required to obtain electrical service after the power company has temporarily disconnected the service. If power has been terminated for any of the reasons listed below you must consult with a licensed electrician and obtain an electrical permit for the work that is to be performed. An Electrical Safety Inspection is performed to check for deficiencies and /or electrical hazards. Any question about the requirements for safety inspection or status of an account should be directed to Rochester Gas & Electric at 1-800-743- 2110.

Do not complete this application if any of the following apply:

- **There are known or visible electrical violations**
- **The unit has been fire damaged**
- **The property does not have a legal use**
- **Electrical system has been tagged by RG&E due to violations**
- **The service has been vandalized or damaged**

OWNER'S NAME: _____ PHONE # _____

APPLICANT NAME: _____ PHONE # _____

ADDRESS: _____

CITY: _____ STATE: _____ ZIP _____

Permits require a 24-48 hour processing time before an inspection can be scheduled. If you have an emergency please contact the City Inspection & Compliance Services Unit at (585)-428-6520 to schedule an appointment. Emergency inspections will only be performed if power was terminated due to a fire and the unit has not sustained major water or fire damage; a tree fell on a service wire; or, as determined by the Director of Inspections & Compliance Services. Upon completion of the inspection and inspector approval, paperwork will be sent to RG&E for processing by the following business day.

It is the responsibility of Owner / Applicant to verify with Rochester Gas & Electric that there are no known or outstanding violations at the property that will prevent the City of Rochester from granting a safety Inspection approval. **No refunds will be granted after the initial inspection has been performed.**
