Hello Anna,

Here are pictures of the universal storage containers which we installed last year at Heartland Storage - Lynwood with address 21686 E Lincoln Hwy, Lynwood, IL 60411, which is a southern suburb of Chicago. The last two pictures, where they are installed on asphalt, would be what you could expect to see with our project in Rochester. The units will be side to side similar to those last two pictures, with no gaps between any units, and level. This project is right off a busy highway (Highway 30 aka E Lincoln Hwy).

Thank you,

John

Hi John,

Thanks for the call. Per our discussion, you're going to send some pics of your Linwood, IL project.

Kind regards,

Anna L. Keller

Subject: Re: Ormond Street Application

Hello Anna,

The third picture down is the exact orientation we would have for our units. You can see there is one unit at the end which would be facing the sidewalk, and then all the other units next to it have doors which would be facing our building. If you imagined looking at that page 3 picture through the decorative black fence we would be using, it is exactly what a pedestrian would be seeing. The other locations we have these units are not in the same orientation and are not near a sidewalk, and since we just installed them last year, the google street views are not updated. Those pictures are actual pictures of other storage facilities that are using the same product we are proposing installing. A rendering is not going to be better than the actual pictures we just provided - it would literally just be that page 3 picture, enlarged, looking through a black fence.

We started this application process over a year ago and each time we provide more information, or have another meeting, we are asked to provide additional information, which we understand and are doing our best

to provide. At this point, I need to relatively soon order the units in order to achieve the goal of the qualified opportunity zone, which is to invest a significant amount of money into improving this business. That tax incentive has a deadline of 30 months - we are coming up on 24 months and the project will take me up to six months to complete, since these storage units are shipped from overseas, which has a backlog right now. As I mentioned, I already put over \$150,000 into the appearance of the building through tuckpointing, removal of aging awnings, painting the window frames, and new signage. As part of this project, we will be updating the appearance of existing windows on the buildings, repairing/seal coating the parking lot, putting in a much nicer fence, and improving the parking lot for a use that is needed by the community - the addition of these storage units. We will also be doing some repairs on the roof.

I'm asking for the city to please work with me to allow me to sink money into this project, which is the goal of the qualified opportunity zones. I have been and will continue to maintain the building, improve the building, and be a great neighbor to the community.

Thank you,

John

Hi Andrew,

As you know, the PRC couldn't come to a resolution because they didn't have a sense of what the finished project would look like. The developer mentioned having had completed similar projects elsewhere. The PRC requested photographs of what those completed projects looked like so they could picture it at this site. I'm not sure that these pictures show how the units will fit in with the surrounding environment. Are there any other pictures of completed projects maybe from a google street view perspective? If not, could you please prepare renderings so the PRC can see what it looks like from a sidewalk perspective.

Yes, we would like to be on the agenda. We've asked the Developer and their supplier to provide photographs of similar storage projects using those pre-engineered structures. If their unable to provide photos that would be helpful to the committee, we'll prepare a rendering from the street view.

Regards,

Jim

Hi Andrew and James,

The next PRC meeting is 4/27. Would you like to be on this agenda to present these considerations and get the needed recommendation so you can proceed to the Zoning Board? If so, I would just need photographic examples of similar projects you completed elsewhere. The PRC found it difficult to comment on the appearance of the project without elevations of all proposed structures and examples.

Kind regards,

Thanks for your quick response. The letter attached was sent via US Mail along with the photometric plan for site lighting on 3/22/22.

Andy,

Please forward the lighting plans to Anna.

Thanks
